

LFM - NUTS PROCESSING SOLUTION PROVIDER

Automatic Nuts Butter Production Solution

Application & Features

It is suitable for the production of various types of peanut butter such as original peanut butter, smooth peanut butter and crunchy peanut butter;

For raw materials containing impurities such as impurities, stones, mildew and discolored particles, they can be removed by impurity removal equipment to ensure the quality of the finished product;

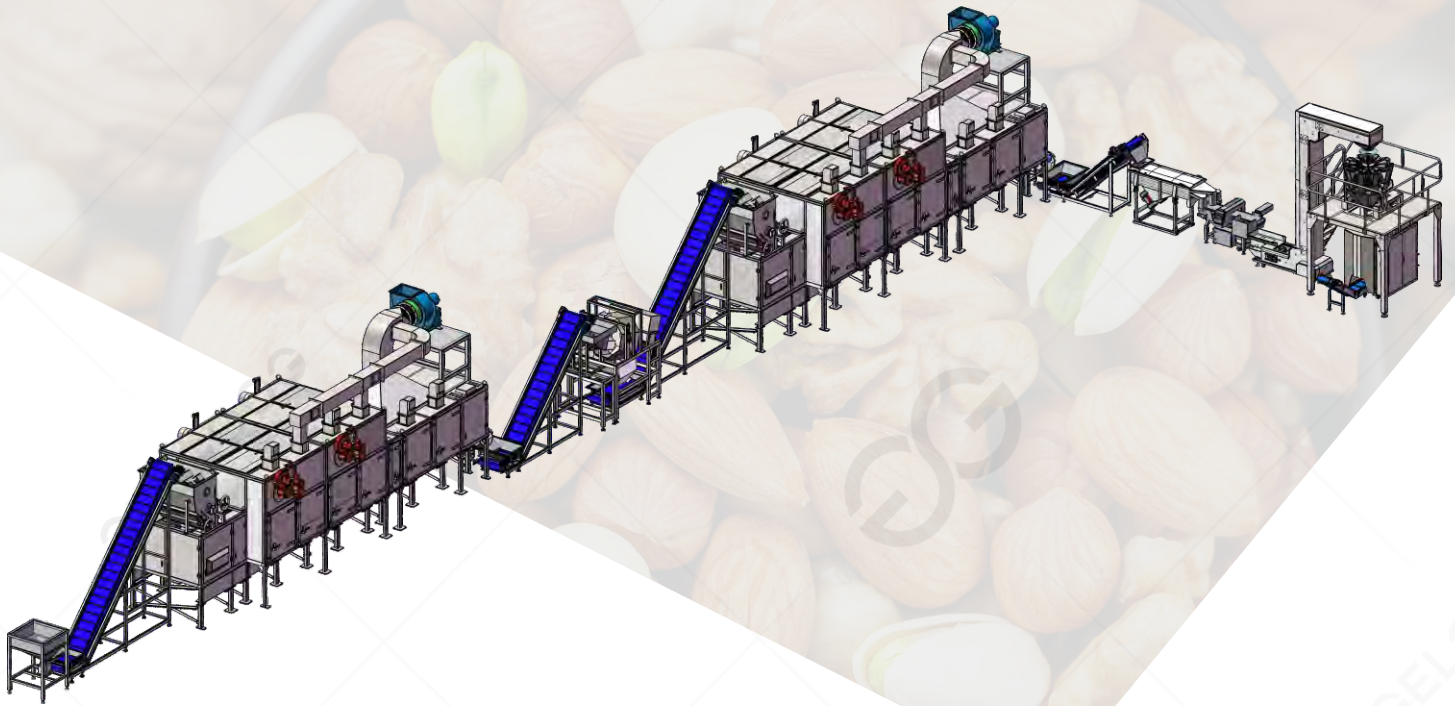

From raw materials to finished products, this production line can realize full-process continuous production, has a high degree of automation, can realize centralized control, and automatically monitor the production process, greatly reducing labor costs;

Matched with fully automatic packaging line, suitable for packaging bottles of various specifications.

Parameters

Model	Throughput	Total Power	Covered Area
GHPB0300A	300kg/h	45kw	45000*3500*3500mm
GHPB0500A	500kg/h	80kw	55000*3500*4000mm
GHPB1000A	1000kg/h	150kw	55000*6000*4000mm

Nuts Roasting and Seasoning Solution

Application & Features

Suitable for all kinds of flavored roasted nut products in the form of powdered surface;

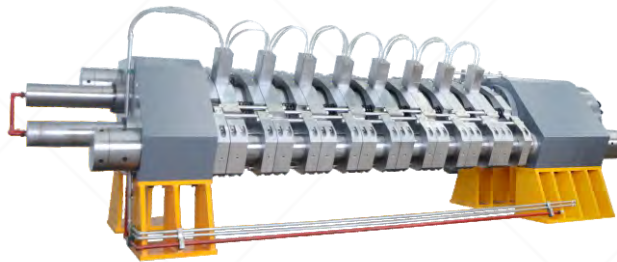

From the original roasting and cooling of raw materials, to seasoning, and then secondary drying and cooling. Fully automatic production can achieve centralized control, reduce labor costs, and improve product quality and taste;

Can process almonds, cashews, peanuts, macadamia nuts, pistachios, sunflower seeds and other granular nuts.

Parameters

Model	Throughput	Total Power	Covered Area
NS0300A	300kg/h	21kw	28000*1600*2550mm
NS0500A	500kg/h	24kw	29000*1800*2550mm
NS1000A	1000kg/h	27kw	33000*2100*2550mm

Natural Cocoa Processing Solution

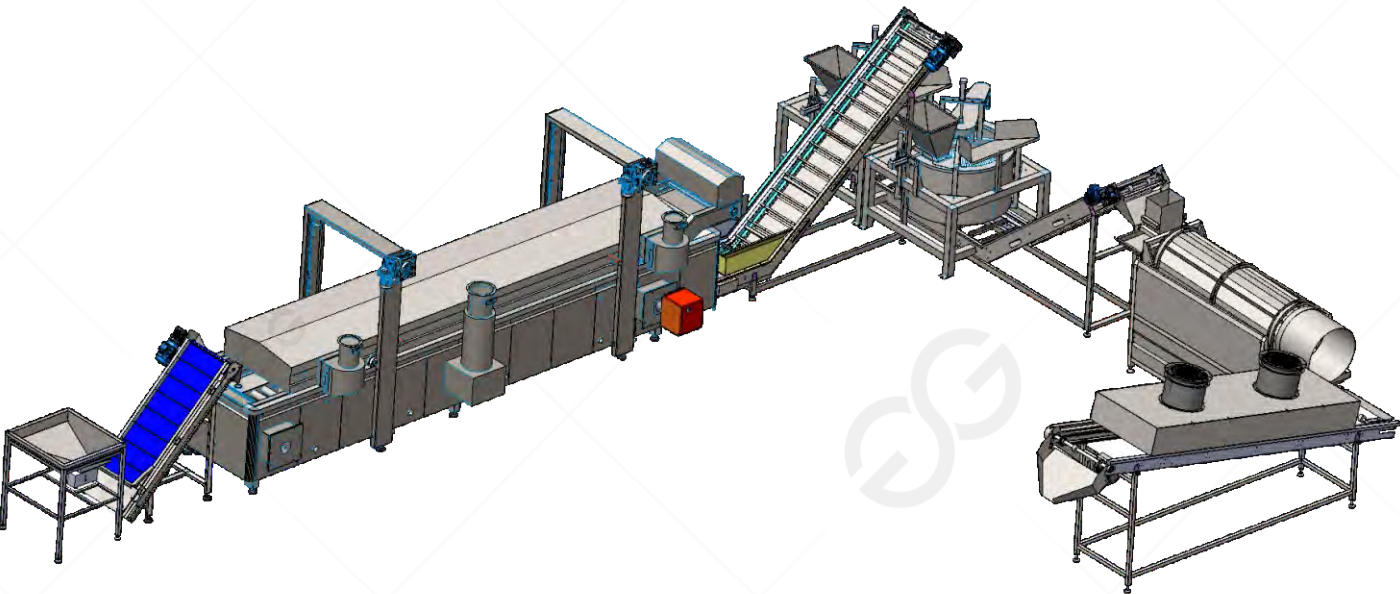

Application & Features

Suitable for production lines that process cocoa beans into four products: cocoa nibs, cocoa paste, cocoa powder and cocoa butter; From the original roasting and cooling of raw materials, to peeling, then grinding sauce, and then pressing and grinding, fully automatic production can achieve centralized control, reduce labor costs, and improve product quality; It is suitable for processing various cocoa beans after fermentation and drying, and adjusts the production line according to customer needs and actual conditions.

Parameters

Model	Throughput	Total Power	Covered Area
GJLF0300YH	300kg/h	110kw	70000*5000*4500mm
GJLF0500YH	500kg/h	280kw	86000*5000*4500mm
GJLF1000YH	1000kg/h	450kw	90000*10000*5000mm

Nuts Frying Processing Solution

Application & Features

Fried peanuts with multiple flavors and good quality finished product;
From raw material cleaning to finished product packaging, the entire process can be produced continuously, with a high degree of automation and centralized control;
The solution has a high degree of mechanization, good reliability, and fully enclosed production. The whole line process flow is clear, and the functions are complete, which ensures the output of finished products.

Parameters

Throughput	Throughput	Covered Area
200kg/h	103kw	43000*6000*5000mm
400kg/h	106kw	51000*6000*5000mm
1000kg/h	145kw	76000*9000*5000mm

COMPANY PROFILE

LFM(Longer Food Machinery) is an independent brand of GELGOOG, born in 2010 in China, is a trusted nut processing solution provider, LFM mainly focuses on nut roasting, grinding sauce, frying, shelling and other processing scenarios, to provide competitive, safe and reliable digital production solutions for the global nut processing industry users.

LFM's products have served more than 2,000 customers in more than 100 countries, including some international companies, such as UNILEVER, CARGILL, MENGNIU Dairy etc. With high-quality products and services, LFM has won wide acclaim from customers.
