Cake Processing Solution

Application & Features

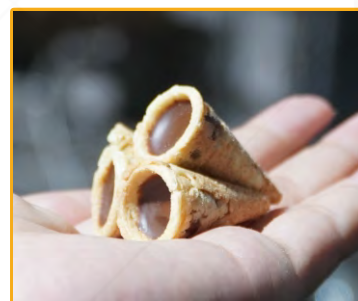

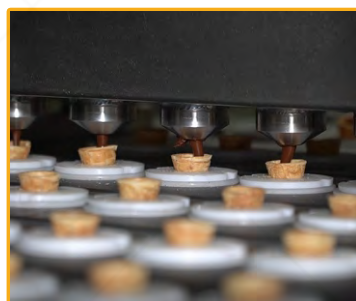

The semi-automatic and fully-automatic industrial cake production line developed by GELGOOG has a production capacity of 100-1000 kg/hour, and the site can be designed and planned according to different product requirements. The materials of the whole production line satisfy the requirements of food safety, and the electronic components adopt well-known brands domestic and abroad, with a high degree of automation, stable operation, large baking capacity, good taste, long shelf life and other characteristics.

The cake production line adopts intelligent modular design, which is composed of different arrangements and combinations. It can not only produce custard pie, cupcakes, sliced cakes, but also produce cakes of different shapes according to the shape of the mold baking pan.
